

Azure Service Advisory

4 week assessment

entelect

Navigate and maximise your journey to Azure

Microsoft Azure presents a substantial breadth of platforms, technologies and tools on which to build and combine.

Making sense of the cloud offerings within this growing tool set can be challenging as it requires experience architecting and migrating solutions on the platform, as well as constant awareness of new or changing services within the Azure universe.

Gold Application Development
Gold Data Platform
Gold Data Analytics

4 week Assessment

Entelect will help you understand the opportunities, costs and options available.

Whether migrating, building or exploring Azure as a platform for your business, we will help you make sense of the choice of platforms and services available.

Week 1
Context and analysis

- As-is technology mapping for existing systems and enterprise architecture
- Technology skills and preferences review
- Strategic context gathering
- Azure services demonstrations and explanations

Week 2
Solutions Architecture and planning

- Solution design workshops
- Integration planning
- Technology choices
- Costing scenarios
- Migration planning

Week 3
Proof of concept

- Rapid prototyping or proof of concept
- Interactive demonstrations
- Assistance with subscription / tenant setup and configuration

Week 4
Outcomes

- Summary and reporting
- Review and present
- Future flight planning

Make sense of the cloud technology choices in the market. Receive tailored and contextual advice on the right tools, technologies and services for business outcomes.
